

Carbon Reduction Plan

Supplier name: Medevolve Limited

Publication date: 22 Jan 2025

Commitment to achieving Net Zero

Medevolve Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: Calendar Year 2023	
Additional Details relating to the Baseline Emissions calculations.	
Scope 1 emissions covers one-off air-conditioning refrigerant charging due to absence of annual servicing, which is expected to be reduced in subsequent reports. Scope 3 emissions exclude downstream distribution which will captured in future reports.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	10.10
Scope 2	1.24
Scope 3 (Included Sources)	199.84
	Upstream Transport: 160.78
	Business Travel: 26.92
	Staff Commuting: 9.29
	Travel Accommodation: 2.71
	Operational waste: 0.09
	Work from Home: 0.05
Total Emissions	211.19

Current Emissions Reporting

Reporting Year: Calendar Year 2024	
Additional Details relating to the Reporting Year Emissions calculations.	
Scope 1 emissions covers air-conditioning refrigerant charging, which was not required in 2024. Scope 3 upstream and downstream transport data separated and real-time data collated for 2024.	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.00
Scope 2	3.34
Scope 3 (Included Sources)	187.58
	Upstream Transport: 10.51
	Downstream Transport: 129.64
	Business Travel: 35.16
	Staff Commuting: 12.18
	Operational waste: 0.09
Total Emissions	190.92

Emissions reduction targets

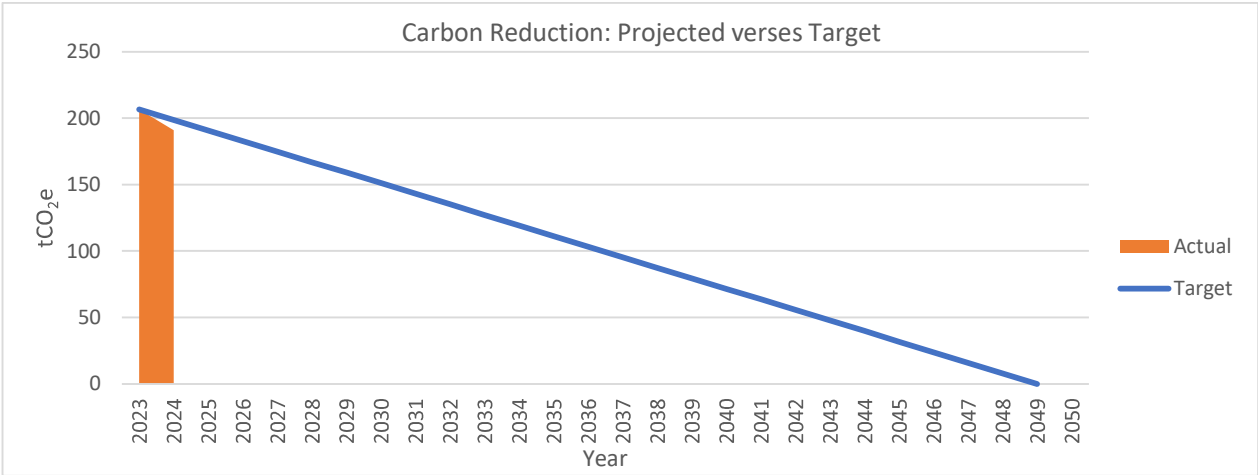

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 172.126 tCO₂e by 2029. This is a reduction of 18%.

To achieve this, Medevolve Limited is committed to;

- providing employee training on mode of transport carbon emissions related to business travel.
- employees to convert to hybrid or better cars, in line with company mileage allowance policy.
- reviewing supplier transportation for lower CO₂ emission routes, including CO₂ offsets.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

In the future we hope to implement further measures such as:

- Investment in carbon reduction projects

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

P. W. Tyler
